

BRUNO

*Battery-Powered
Stairlifts*

A third charging station makes it easy and convenient to charge your stairlift at the top, bottom and even when the rail is flipped up.

A special locking lever aligns the rail and provides a smooth ride when the rail is unfolded.

SRE-2750 Electra-Ride™ LT with 'Flip-Up' Rail Option

*Limited space at the bottom of
your staircase?*

If you're concerned that your new Bruno stairlift will be a tripping hazard or if you have a narrow hallway or doorway at the bottom of your steps, the "Flip-Up" rail option might be a great solution for you!

How does it work?

Simply pull up on the special locking lever that aligns the rail and fold rail up with the assistance of a gas spring. Folding the rail up is a breeze!

 **BRUNO**
for your independence
